

CAPABILITIES STATEMENT

HAVE A CUSTOMER WITH A WATER OR GAS LEAK?

At MGR Leak Detection, we are licensed plumbers and leak detectors.

We have the capacity to find your leak and also make the repairs and provide options to clients for repairs. Traditionally with hard to find leaks, the plumber will attend site and, if they can't find it, they will book in leak detection. From there, they will then make a return visit to make repairs. This process can be frustrating and drag out over time.

All these works can be completed by our team.

ABOUT US

MGR Leak Detection is a Melbourne-based family-run business. Originally from the Bayswater area, we are proud to service all areas of Melbourne. Co-founded and led by Michael Rawnsley and Paul Bryant, MGR Leak Detection are your local experts at detecting leaks in your plumbing systems. Combined, Michael and Paul have almost 50 years' experience in servicing Melbourne's local families plumbing.

Bathroom Leak

Underfloor Leak

Underground Leak

High Water Bill

“We had 2 plumbers at our house, and they couldn't find our gas leak. We spoke to Paul that night, he was able to come out the next day, and found gas leak within the first hour of him being on site. He was then able to send in their plumbing team to make the repairs the same day, absolutely awesome customer service. Will definitely recommend to my friends and family.
